Product Description

Seamless Steel Pipe For Transporting Fluids Such As Oil, Natural Gas, Water

Seamless steel pipe manufacturing ring parts can improve material utilization, simplify manufacturing processes, save materials and processing hours. A large number of pipelines are used to transport fluids, such as oil, natural gas, gas, water and some solid materials. Compared with solid steel such as round steel, steel pipe is lighter when its bending and torsional strength is the same. It is a kind of economic section steel and widely used to manufacture structural parts and mechanical parts.
